

Ivermectin

The Nobel-Prize-winning miracle drug Ivermectin offers global solution against all RNA viruses and many other diseases.

“First, Do No Harm” – is one of the principles of Hippocrates (Latin – “Primum Non Nocere”). Ivermectin, DMSO, and Vitamin C are 3 of a few compounds that meet the requirement “Do No Harm”, unlike other substances, including OTC drugs like aspirin. Biomedical researchers concur that Ivermectin is a genuine miracle drug developed by Nature. Soil bacteria use Ivermectin to combat different viruses and bacteria. It was discovered in 1970-s and found to be uniquely non-toxic compound with no adverse side effects. In 2015, the Nobel Prize honored the discovery of Ivermectin. During 40+ years it was deployed against an array of tropical diseases caused by parasites. Later, other medical applications (off-label use) of Ivermectin were discovered and studied. It is common that a compound approved for one disease turns to be active for others. Viagra, for example, was originally discovered as a cardio medicine for pediatric patients. Viagra is still prescribed to young girls with cardio disorders. Paradoxically, social tension and corruption in healthcare caused by Corona-virus pandemic made it difficult to repurpose inexpensive FDA-approved drugs to treat COVID-19. The reason for such paradox was rather in corruption of the top echelons of U.S. healthcare.

For prophylactics of Corona, flu and other RNA viruses apply one spray, which is ~1.5 mg of Ivermectin, into your mouth. Do not swallow; inhale the vapor into your lung; exhale through your nose to populate you sinus with Ivermectin solution vapor. This works for 3-4 hours as prophylactics against any RNA virus, including COVID-19 and flu. For treatment of Corona and flu symptoms apply 10 sprays (~15 mg) into your mouth and swallow.

Dr. Ben Carson, Johns Hopkins University, showed that “...we now effectively know that the anti-parasite drug Ivermectin has a significant effect on reducing COVID mortality.” However, clinical trials require ~\$50M, which only a recently patented drug could engage in hopes of selling a priced remedy to millions. Repurposing off-patent, inexpensive drugs like Ivermectin for off-label use does not promise large profits. It is the real problem. Nevertheless, Ivermectin efficiently stopped pandemic in Africa: <https://doi.org/10.1101/2021.03.26.21254377>” Ivermectin overcomes all RNA viral infections, including ALL Variants of Corona and flu viruses, as well as several types of cancer, tuberculosis, and inflammations. Ivermectin studies describe it as a wonder drug [www.ncbi.nlm.nih.gov/pmc/articles/PMC3043740. New Microbes New Infect, 2021 Aug 3;43:100924. Ivermectin: a multifaceted drug of Nobel prize-honored distinction with indicated efficacy against a new global scourge, COVID-19. A Santin et al].

The State of Nebraska was the first U.S. state, which approved Ivermectin for COVID-19 prophylactics and treatment. Ivermectin is uniquely non-toxic. In 2023, Donfo-Azafack informed [Journal of Medical Case Reports (2023) 17:141 <https://doi.org/10.1186/s13256-023-03891-4>] that an amount of Ivermectin which over 100X exceeded the standard dose taken with the evident suicide purpose was not toxic, which confirmed unique safety of Ivermectin, even at exceptionally high doses. Ivermectin has successfully passed through numerous clinical trials for prophylaxis and treatment of COVID [<https://clinicaltrials.gov>]. In 2020 a review on anti-viral use of Ivermectin was published: “...Efficacy of Ivermectin in the Prophylaxis and Treatment of COVID-19.” Kory P, Am J Ther. 2021.

On the other hand, a multitude of novel therapeutic agents were unsuccessfully tried in clinical trials. The lack of sufficient anti-viral properties was shown for nearly all other pharmaceutical agents, except Ivermectin. Other agents turned to be ineffective in reducing the mortality of COVID-19. Based on published clinical trial results, in particular the SOLIDARITY trial, the results of trials virtually eliminated any treatment role for Remdesivir, Lopinavir/Ritonavir, Interferon, and Tocilizumab. In contrast to the growing list of failed therapeutics in COVID-19, the FLCCC recently discovered that Ivermectin has highly potent anti-viral, and anti-inflammatory properties against COVID-19 and many other viruses. Repeated, consistent, large magnitude improvements in clinical outcomes have been reported when Ivermectin is used not only as a prophylactic agent but also in mild, moderate, and severe disease states from multiple, large, randomized and observational controlled trials.

The North India Uttar Pradesh state of 231 million people eradicated COVID with an Ivermectin treatment program, representing one of the greatest public health achievements in history. It was kept a global secret: <https://pierrekorymedicalmusings.com/p/the-miracle-not-heard-around-the>

Ascorbic Acid - Vitamin C

Ascorbic acid, aka Vitamin C, has many benefits for human health, including: 1) Anti-oxidation effect –it protects cells from damages caused by free radicals that are produced in food metabolism and may contribute to the development of cancer, heart disease, and arthritis. 2) Vitamin C is necessary for the growth, development, and repair of all body tissues, including bones, cartilage, blood vessels, and muscle. 3) Ascorbic acid supports the proper functioning of the immune system. 4) Ascorbic acid helps the body absorb iron from plant-based foods. 5) Studies suggest that high vitamin C intake protects intellectual capabilities and memory; while low levels of vitamin C correlate with impaired thinking and memory. 6) Vit C promotes healthy gums, reduces allergy-related responses and the effects of sun exposure. The body doesn't store Vit C. It's important to get it from your diet regularly. It helps the body make collagen, which is important for wound healing, healthy skin, cartilage, tendons, ligaments, and blood vessels. You can get ascorbic acid from fruits and vegetables, and it's also available in pill form. Linus Pauling, winner of two Nobel Prizes, studied Vitamin C and discovered numerous therapeutic benefits of this natural compound. Literature references are available here: www.lpi.oregonstate.edu.

Dimethyl Sulfoxide (DMSO)

DMSO is one more miracle compound of natural origin. DMSO is obtained from wood and has been shown to be a panacea from numerous health problems. More than 40,000 research articles have been published on the greatest range of healing effects ever recorded for a single compound. Its comprehensive healing properties are unique, all working in synergistic harmony. However, the general public remains unaware of these discoveries, partly as a result of efforts from certain quarters to suppress the dissemination of that information, similar to that for Ivermectin. Having been treasured as a secret for many years by a small number of specialists and alternative practitioners, DMSO is currently enjoying a remarkable comeback.

Handbooks on DMSO include THE DMSO HANDBOOK, A New Paradigm in Healthcare by Dr. H. A. Fischer and Dr. S. Dafydd, available here: https://books.google.com/books/about/The_DMSO_Handbook.html?id=t7nijwEACAAJ ISBN-13 978-3981525557, First English edition, December 17, 2015 Daniel Peter-Verlag Publisher for new consciousness. This book is a comprehensive reference work on DMSO intended as a practical, application-oriented reference book for patients who treat themselves, as well as for medical doctors and alternative health practitioners. Medical and pharmaceutical studies have shown that DMSO has the greatest range of healing effects for a single substance. Over the last 60 years, more than_FORTY THOUSAND RESEARCH ARTICLES on this substance have been published. "The DMSO Handbook" makes this information available in an engaging manner, revealing all about this universal medicine and its applications. Dr. Fischer, a health practitioner with a background in pharmaceutical research, has been studying DMSO for many years and uses it privately and professionally in his practice.

One more handbook by Archie H. Scott, iUniverse, LLC, Bloomington, 2015.02.01 can be downloaded free of charge here: <https://www.eden-shop.eu/wp-content/uploads/2020/06/Scott-Archie-DMSO-Handbook.pdf>. The table of contents below demonstrates the broad spectrum of DMSO applications. The Concentrations Chart provides practical recommendations for DMSO uses.
